

Looking for HIWI

The Augmented Vision Department of DFKI, led by Prof. Dr. Didier Stricker, is looking for a research assistant (Hiwi) interested in developing and creating an annotation tool by the use of SAM or other recent foundation models.

Your Task

- support the development of an annotation tool integrating the Segment Anything Model (SAM)
- train, test and integrate state-of-the-art detection and segmentation models
- conduct literature research to address upcoming challenges
- contribute your own ideas and solutions
- work up to 40 hours per month

Your Qualifications

- basic knowledge in Computer Vision and Deep Learning
- strong programming skills in Python
- advanced Bachelor or Master student
- reliable and conscientious working style
- good communication in English or German

Your Benefits

- enhance your skills in the field of Computer Vision and Deep Learning
- collaborate in an industry-related project focused in plastic waste sorting and recycling(ReVise-UP)
- enjoy flexible working times for better compatibility with studies

Application Process

- send me your motivation why you are the right person for the job
- attach your CV and latest transcript
- application in German is possible
- application only via mail
